\*Low precision; no estimate reported.

<sup>a</sup> Difference between estimate and 2005 estimate is statistically significant at the 0.05 level.

<sup>b</sup> Difference between estimate and 2005 estimate is statistically significant at the 0.01 level.

<sup>1</sup> Smokeless Tobacco brands listed alphabetically are the reported 15 brands used most often among the civilian, noninstitutionalized U.S. population aged 12 or older in 2005; however, these are not necessarily the 15 brands used most often among the subgroups shown in this table.

<sup>2</sup> These 2004 estimates are denoted by a "--" because the indicated brand names were reported as an other-specify in 2004 but were listed as response options in the 2005 questionnaire; thus, the 2004 and 2005 estimates are not comparable.
